

The mature sibling, *finally* *siblings.*

v0.4 incorporates feedback from the last review. The mark is adjusted, not replaced. The palette is now genuinely derived from the parent practice.

VBP gave us the genes. *VBAM grows them up.*

The previous palette was inspired by the coast in the abstract. This one starts from the actual VBP color codes and matures each one. Four colors are kept and deepened, two are dropped (pure pediatric), and two grown-up neutrals join the family.

SOURCE · VERO BEACH PEDIATRICS

The parent *palette*.

Bright, primary, high-energy. Built to delight kids and reassure parents. Six colors, fully saturated.

PRIMARY

SECONDARY

MATURE
DERIVE

DERIVED · VERO BEACH ADULT MEDICINE

The mature *sibling*.

Same lineage. Deeper blues, warmer yellows, refined orange. Pink and lime drop. Sand and Foam join as grown-up neutrals.

PRIMARY

SECONDARY

Modern adjusted, *not redrawn*.

A look at the parent mark, the v0.3 Sun & Sea concept, and the v0.4 adjustment. Three small but meaningful changes pull v0.4 into actual sibling territory with VBP without losing the calm, grown-up feel of v0.3.

PARENT · VBP

VBP *original*

Half sun, playful brush-stroke rays, blue puddle horizon. Bright, energetic, drawn-by-hand feel.

ROUND 1
CONCEPT

V0.3 · SUN & SEA

v0.3 · The *previous* draft

Floating full sun, three line waves, abstract coastal palette. Calm but not yet a clear sibling.

ROUND 2
ADJUSTED

V0.4 · SUN & SEA

v0.4 · *Mature sibling*

Half sun on horizon, restrained geometric rays, two waves. VBP-derived palette. Genuine family resemblance.

✓ MARK ADJUSTED · CONCEPT LOCKED

Three small moves *made it siblings.*

*The composition didn't change. The anatomy did.
Each adjustment is a quiet handshake with the VBP
mark.*

- 01 **Half sun on the horizon.** Instead of floating above the water, the sun now rests on the horizon line — VBP's most iconic anatomical move, brought into the adult brand.

- 02 **Restrained geometric rays.** Five fine lines radiating from the sun, where VBP has playful brush strokes. Same idea, grown-up execution. Hint of warmth without the kid energy.

- 03 **Two waves instead of three.** The front wave is now the horizon line itself — the sun sits on it. The second wave underneath gives motion. Cleaner, more confident.

- 04 **VBP-derived colors throughout.** Sun gradient is now Amber to Coral (matured VBP yellow + orange). Waves are deep Atlantic and Tide (deepened VBP blue). True genetic match.

Vero Beach *Adult* *Medicine*

SUNRISE TO SHORELINE CARE

MARK GEOMETRY · V0.4 · REFINED

Five primaries, *two grown-up neutrals*.

Every color traces directly back to a VBP source. Each one is deepened, warmed, or refined ~10-15% so the palette reads confident in adult settings without losing the warmth that makes VBP feel like Vero. Sand and Foam are new — neutrals the kids' brand doesn't need but the adult brand does.

PRIMARY · THE SUN, THE SEA, THE SKY

NEUTRALS · GROWN-UP GRAVITAS (NEW)

RECOMMENDED APPLICATION RATIO

Six things we want *your reactions on*.

v0.4 narrowed some things and opened others. These are the calls we want stakeholder reactions on before we ship v0.5.

QUESTION 01 · RAYS

Are *five rays* the right count?

Currently five rays radiate from the sun. Could go to three (more restrained) or seven (more VBP). Five reads modern and balanced.

- Keep five rays
- Reduce to three for more restraint
- Try seven for stronger VBP echo
- Remove rays entirely — half sun alone

QUESTION 02 · SUN GRADIENT

How *warm* should the sun be?

Current gradient runs Amber to Coral — both VBP-derived. Could go pure Amber (matches VBP yellow exactly) or push toward Coral (more energetic).

- Keep Amber → Coral gradient
- Pure Amber — closer to VBP yellow
- Coral-heavy — more energy

QUESTION 03 · WAVE COLOR

Front wave: *Atlantic or Tide*?

Front wave is currently deep Atlantic. Could swap to Tide (lighter, friendlier) which matches VBP's blue more directly. Atlantic gives more gravitas.

- Keep Atlantic — deeper, more confident
- Switch to Tide — closer to VBP blue
- Atlantic on front, Tide on second wave

QUESTION 04 · TAGLINE

Does "*Sunrise to Shoreline Care*" earn its keep?

Carried over from v0.3. Might be doing too much work, or might be the warmth the brand needs.

- Keep as the formal tagline
- Internal mantra only, drop from mark
- Try "Modern Care, Vero Beach"

QUESTION 05 · APPLICATION RATIO

Should Atlantic *really* lead at 35%?

The ratio puts deep Atlantic as the dominant brand color. Could lead with Foam (lighter, airier) or Amber (warmer). This is a big tonal call.

- Keep Atlantic-led — 35% gravitas
- Foam-led — 50% airiness, Atlantic 20%
- Amber-led — warm-first identity

QUESTION 06 · NAMING

"Adult Medicine" — *does it sing*?

Carried over from v0.3. Functional and accurate. Could test "Primary Care" or just "Medicine" before locking.

- Keep "Adult Medicine"
- Test "Primary Care"
- Test simply "Medicine"

From v0.4 to *v0.5 and beyond.*

v0.4 brought the brand into proper sibling territory. The next round refines the small calls — ray count, wave color, application ratios — and locks the mark for system build.

PHASE 01 · DONE

Direction Selected

Sun & Sea chosen from four concepts.

PHASE 02 · DONE

First Review

v0.3 stakeholder feedback gathered.
Mark and palette flagged for VBP alignment.

PHASE 03 · NOW

Second Review

v0.4 adjusts the mark (modern, not redrawn) and derives the palette directly from VBP.

PHASE 04 · NEXT

Lock & Build

v0.5 incorporates feedback. Polish geometry, finalize lockups, build the full identity system.
